

Greenhouse & Walking Trail

Our therapeutic gardening center and outdoor walking trail, located on Blossom Hill's property in North Royalton.

- The greenhouse is a space where individuals participate in gardening activities designed using an evidence-based curriculum.
- The gardening center offers the opportunity for individuals to develop work, management, and teamwork skills as they share responsibility for maintenance and upkeep of the greenhouse and gardens.
- The fully accessible walking trail allows for focused access to nature, including all of its stimulation — sight, sound, touch, and smell.
